For Health Partners

The Chicago Housing Authority (CHA) Health Partnership Program invites health-related organizations to collaborate in delivering valuable health related information to residents. Participation in the program is voluntary and unpaid, ensuring that all partnerships focus solely on enhancing resident well-being. Organizations must complete an application for review and approval, which includes alignment with resident needs and compliance with program guidelines.

Approved partners are authorized to conduct health-related events in CHA common areas, with activities scheduled based on resident interest and logistical feasibility. Partnerships are valid for up to two years and are subject to renewal. The program maintains a high standard of integrity, reserving the right to deny or revoke partnerships for non-compliance or resident feedback.
